DETAILED ACTION

Response to Amendment

1. Examiner acknowledges that the applicant has cancelled claims 1-11, 13, 14, 16, & 21-24 and newly added claim 25 which includes all of the limitations of the base claims 21, 23, & 24 (claim 24 was objected but allowable if rewritten in independent form including all of the limitations of the base claim(s) and intervening claim(s)).

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the claim recites the biasing portion biases the lever towards a first position such that the biasing portion extends away from the back surface of the mounting bracket and the switch-engaging portion does not engage the switch, further wherein securing the mounting bracket to the air duct places the lever in a second position such that the switch-engaging portion engages the switch and the biasing portion does not extend away from the back surface of the mounting bracket. None of the references cited disclose the details of the biasing portion biases the lever towards a first position and a second position of the switch, nor is there any motivation to combine them, the claims are deemed patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
